About

About Notebook

Notebook is a simple Notebook/Note taking application. You can have any number of Notebooks. Each Notebook can contain any number of Notes. Note can be of any length. a Note can have any number of sub-notes.

This application was built by using ICEDesigner GUI Designer, and Themes are enabled by using ObjectTheme, BOTH Products are the brain child of **ChrisR**.

Thanks Chris!

This is a Free Application.

Getting Started

Getting Started

Notebook is an easy to use system.

Select the desired Notebook.

This will Automatically populate the Note Tree with Existing Notes.

Upon selecting a Note in the tree the Note details will be displayed in Notes Panel.

The Note tree is built by you choosing to create sibling or Children Notes.

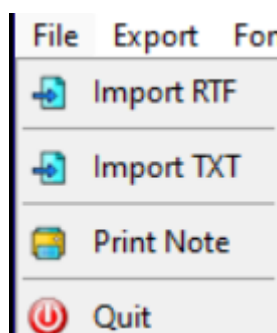

Have Fun!

Main Menu

The Following series of screen shorts show the system menus.

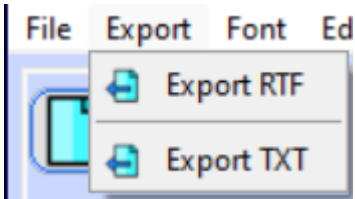

File Menu:

Import Options will insert INTO current Note.

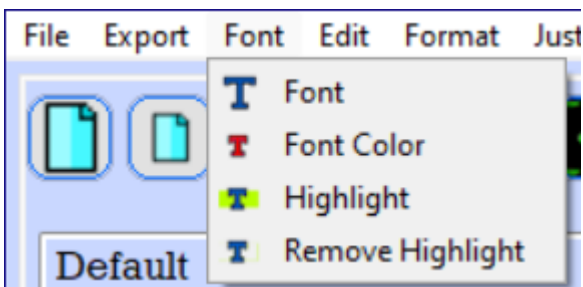

1. Import RTF - Brings up file selection dialog to Import Rich Text File (RTF) file into current Note.

Shortcuts

Shortcuts

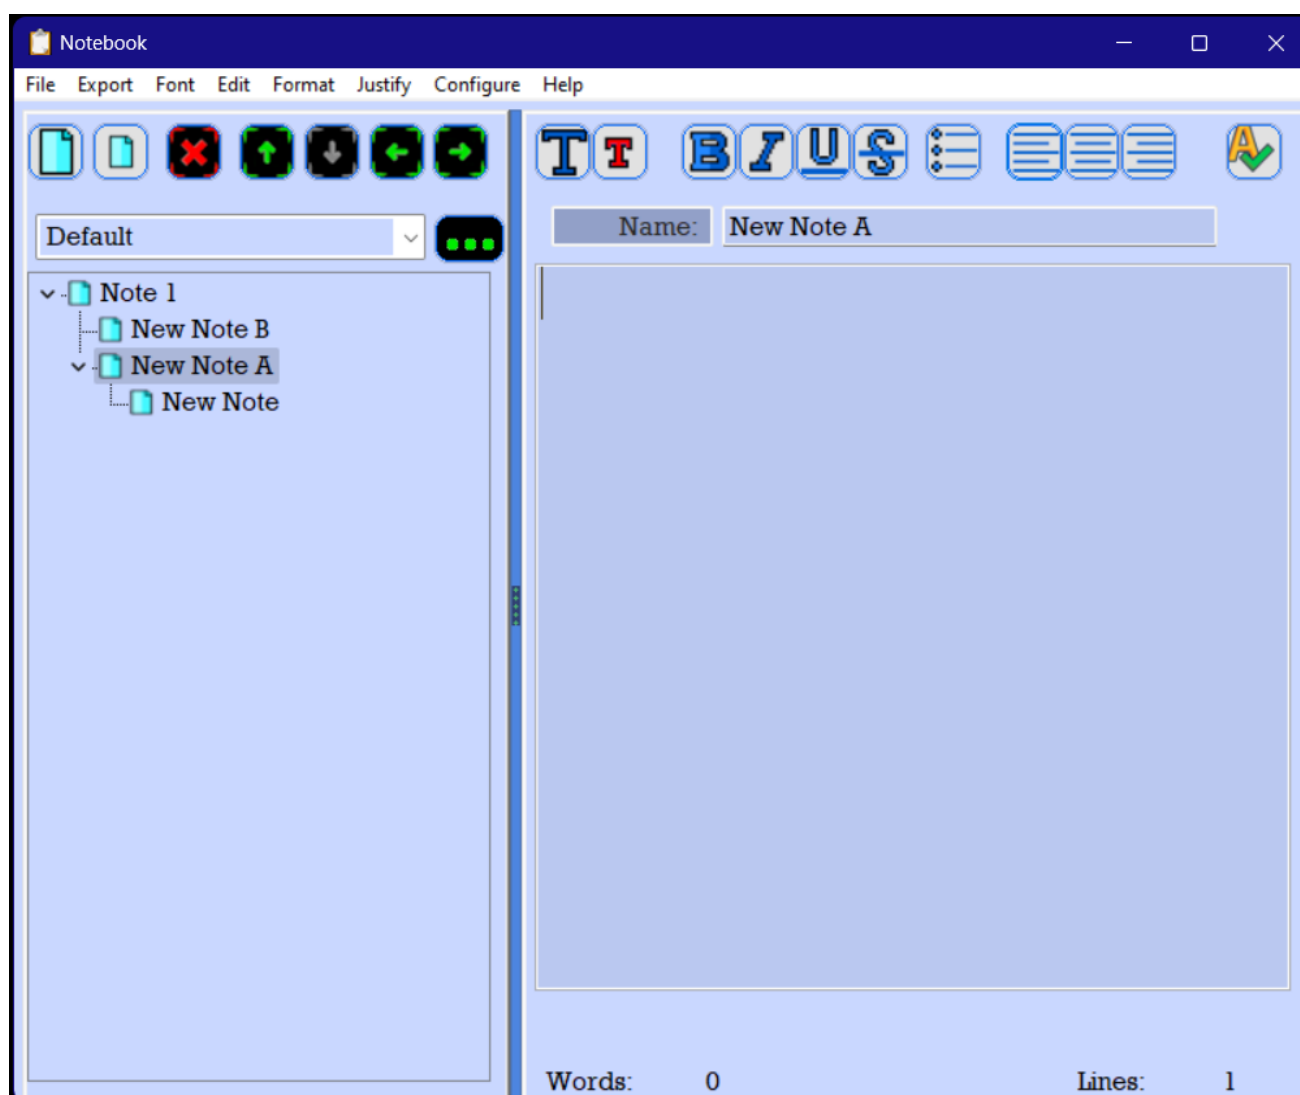

I have made every effort to include ALL "standard" shortcuts. These Are as Follows:

- CTRL + A = Select All
- CTRL + C = Copy Selected Text
- CTRL + V = Paste Copied Text
- CTRL + X = Cut Selected Text
- CTRL + Y = Redo
- CTRL + Z = Undo
- CTRL + L = Justify Left
- CTRL + E = Justify Center
- CTRL + R = Justify Right

Screens

Main Screen

Main Screen

The Notebook Main Screen is divided into two primary Panels. On the left is the **Tree Panel**, on the right is the **Note Panel**.

Each Panel has it's own Toolbar. (see [Toolbars](#) for information on these)

The ComboBox is your Current Notebook. Use the Ellipse button on Right to Maintain your list of Notebooks.

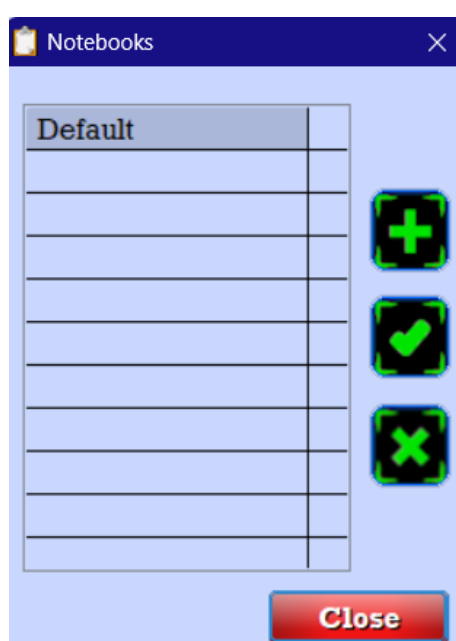

The Notebook Tree will Grow As you Add Notes into the Selected Notebook. The Tree itself is generated by You as you add Notes as Siblings or Children of existing Notes. Furthermore, the Tree can be manipulate by using the Tree Panel Toolbar.

The Note Panel will display the Currently selected Note.

Notebooks

Notebooks

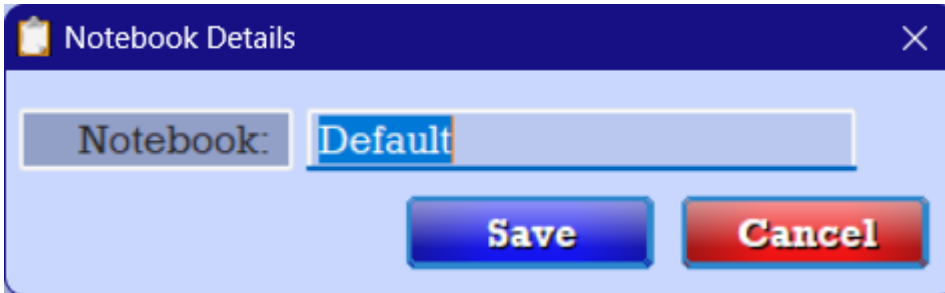

The Notebooks Screen is displayed by clicking the Ellipse Button in the Tree Panel.

1. Create Notebook Button - Will let you create a New Notebook.
2. Modify Notebook Button - Will allow you to change the Selected Notebook.
3. Delete Notebook Button - Will Delete the Selected Notebook, this will Delete ALL notes in the Notebook.
4. Close Button - Will Close this screen, returning you to the main screen.

Notebook Detail

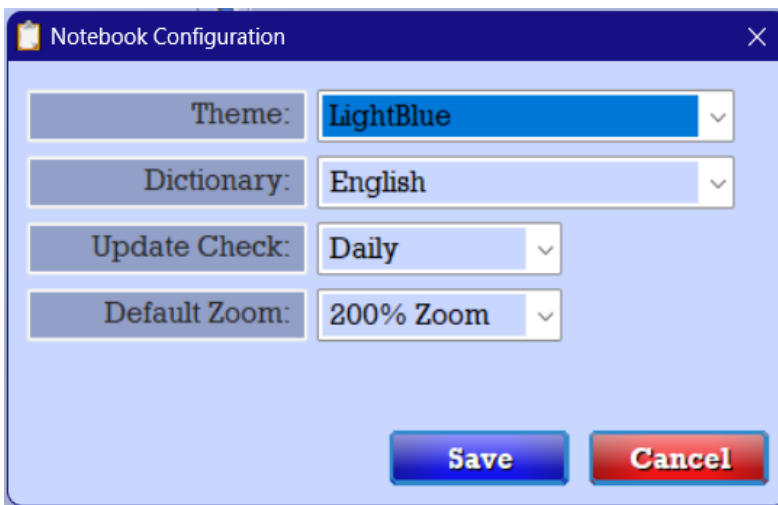

Notebook Detail

1. Notebook Name - Enter a Unique Name for your Notebook.
2. Save Button - Will Save Changes and return you to the Notebooks Screen.
3. Cancel Button - Will disregard any changes returning you to the Notebooks Screen.

Configuration Screen

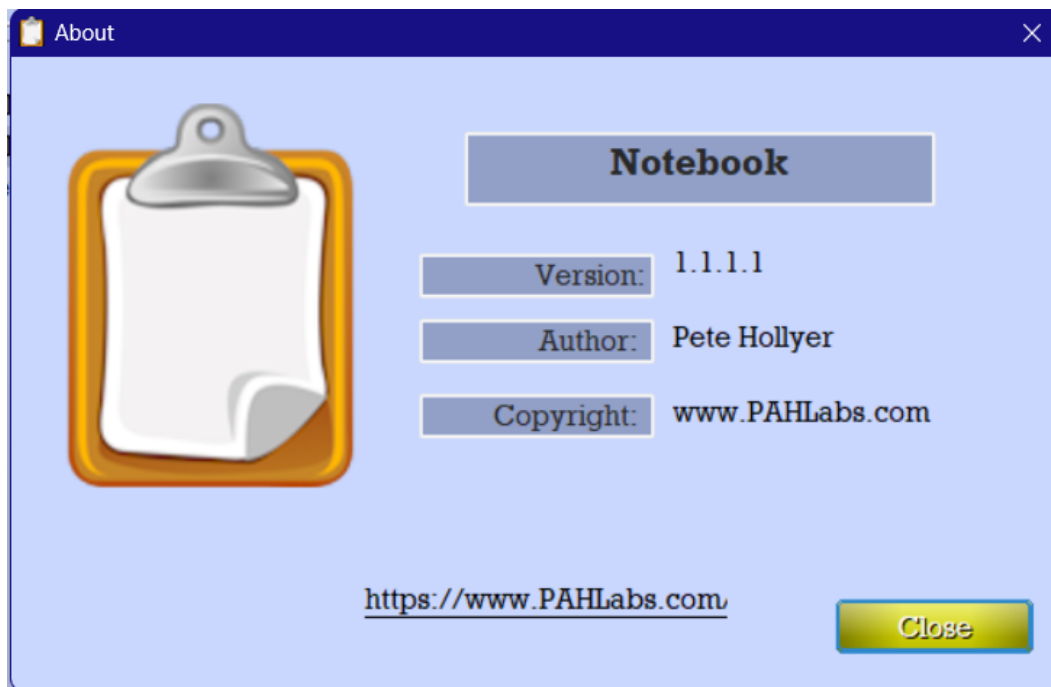

System Configuration

1. Theme Selection - Choose your Desired Theme. Requires Reboot!
2. Dictionary Selection - Choose your system Dictionary.
3. Update Check - Frequency the system will check for updates.
4. Default Note Zoom - The RTF Zoom setting on Note Panel.
5. Save Button - Will Save Changes and return you to the Main Screen.
6. Cancel Button - Will disregard any changes returning you to the Main Screen.
